The Dignity of Kings is great ; but then
They're subject to the Fate of other Men.
May Heaven with Health, Long Life, and great Success,
The matchless GEORGE, our Royal Monarch, bleis:
May his Success Abroad his Might proclaim,
To add eternal Trophies to his Name.
And as his Soul, immortal make his Name.

The Vulgar or Common Notes and Moveable Feasts for
the Year 1761.

Golden Number	14	Easter Day,	March 22
Epact	—	Rogation Sund.	Apr. 26
Cycle of the Sun	6	Ascension Day,	Apr. 30
Dominical Letter	D	Whitsunday,	May 10
Shrove Sunday,	Feb. 1	Trinity Sunday,	May 17
Midlent Sund.	Mar. 1	Advent Sunday,	Nov. 29

IT is necessary to be remembered, that by virtue of an Act of Parliament, made in the Year 1751, for Alteration of the Stile, the Beginning of the Year was changed from the 25th of *March* to the 1st Day of *January*. This Change took place on the 1st of *January* 1752; and the Act enjoins and directs, that from and after that Time every succeeding first Day of *January* in every Year to come, shall be the first Day of that Year respectively; and that all Deeds and Writings, of what Nature and Kind soever, shall be dated accordingly.

In Consequence of the same Act of Parliament, the Use of the *Julian* Account, or Old Stile, heretofore followed in this Country, ceased on the second of *September* of the same Year 1752; and by dropping or leaving out eleven nominal Days, and calling the next, which was to have been the third, the fourteenth, the New Stile took place; and from thence, by the said Act, is directed to be used for all Time to come, in all his Majesty's Dominions subject to the Crown of *Great Britain*. By this Alteration, the several Fixed or Immoveable Feasts, as they are ordered to be placed in the New Calendar upon the same nominal Days of the respective Months as they were placed upon in the Old, will come eleven Days earlier than they would otherwise have done, and thereby would have made all things depending upon them, such as the Opening or Inclosing of common Fields and Pastures, the Holding of Fairs and Marts, the Payments of Rents and Annuities, and the Commencement or Extinction of many private Rights and Matters of Property, do the same: To prevent therefore any Inconveniencies arising therefrom, the Act provides and directs, That the Opening or Inclosing of Pastures, the Payments of Rents, Annuities, and all other things depending on the Fixed or Immoveable Feasts, shall not by this means be accelerated or forwarded; but that the Days of opening or shutting such Pastures, of paying such Rents or Annuities, and of doing all such other Matters and Things formerly to be done and performed on the said Feasts, shall be kept, observed, and performed on the same natural Days of the Year on which the said Feasts would have fallen, if this Act had not been made. For this Reason the 5th of *April* is called *Old Lady-day*, and the 10th of *October* *Old Michaelmas-day*, and so of the rest, as being the respective Days on which all such Rents and Payments become due, such Rights take place, and such Matters and Things to be done, and not before. All that is here said relates to the several Things above mentioned depending on Fixed or Immoveable Feasts; but all such as depend on Moveable Feasts, or on Days depending on them, are to take place, and be reckoned according to the New Calendar, in pursuance of an Act of Parliament of the Year 1752, for amending the former Act of the Year 1751.

N. B. That all Dates of Births, Deaths, or other remarkable Events, in the Regal or Chronological Tables, prior to, or upon, the 2d of *September* 1752, are to be understood according to the *Julian* Account, or Old Stile; but after that Time, the annual Returns of them are placed in the Calendar Part of the Almanack, according to the New Stile, eleven nominal Days later. As for Instance; the Day of the King's Coronation, in the Chronological Table, is mentioned on the 11th of *October*, on which Day that Ceremony was performed in the Year 1727, when the Use of the Old Stile subsisted; but now, in the Year 1761, after the New Stile takes place, the 34 Years, since that happy Event, will not be fully completed, or accomplished, till the 22d Day of the same Month, where the Return of it is placed: And the same is to be understood of all other Events of the like sort.

January hath XXXI Days.

What is this blind and unseen Creature, Fate,
 What sways our Will, what doth predestinate?
 What are the Laws of Nature, what of Sense,
 What is Free-will, and what is Providence?
 How came I thus to be compleatly free
 To every thing but what I ought to be?

February hath XXIX Days.

What is this Fate? where doth it dwell or grow?
 I've felt it oft, and so have you I know.
 'Tis something if 'tis felt, 'tis bad or good,
 But by its Name there's little understood;
 'Tis more indeed than Name, in each Man's Lot
 Is it a Creature, think ye? or is't not?

											Sea and Land are much spoken of.

March hath XXXI Days.

Fate is an Agent with first Causes made,
By Springs from Heaven moves, and is obey'd ;
It finds a way to enter with the Breath,
And crowds its Force into all things on Earth ;
'Tis good or bad, one of which never fail ;
Hence the Good suffer, when the Ill prevail.

April hath XXX Days.

If this is Fate, then it serves God's Decrees,
 And brings to us what he before foresees :
 It drives, and yet is driven by a Power,
 That stops not till it meets th' appointed Hour ;
 If so, 'tis plain it doth Heaven's Laws dispense ;
 If this is true, then what is Providence?

This Providence, I doubt, we take amiss,
 The Word at first looks greater than it is :
 For *Austin* makes (tho' by a different Name)
 Prudence and Providence almost the same.
 If Providence is *Ante video*, then
 It is a Virtue lodg'd in prudent Men,

	17	28			♈	*	21	17	8	We may also expect to hear
	18	29	*	♈	8	13	*		9	of the Indisposition of some
	19	30	2	4			22		10	foreign Prince, or that he is
	20	D							11	not so active as formerly.

June hath XXX Days.

With an unwearied Hand and Foot it goes,
And dwells above; among the Stars it grows,
Surveys us here, and yet doth higher climb,
Nestling itself into the Nest of Time,
Where all's supply'd that is with Age decay'd,
And makes it there almost before 'tis made.

September hath XXX Days.

'Tis pretty hard, since they o'erſway the Will,
And teach us Good, that we grow worſer ſtill;
Perhaps you'll ſay, our Nature thus inclines,
They move to Virtue, we increaſe our Crimes;
That's pretty odd to ſay (how can it be?)
My Heart is guilty, but my Hands are free.

October hath XXXI Days.

Still to grow worfe, shews (if I say I'm free)
 My Will is not the thing it ought to be :
 For how can Will be free, when still we run
 Into those Mischiefs which we ought to shun ;
 But where the Passion's strong that guides the Lust,
 His Fate is hard, he sins because he must.

Observations.

Day 11 Hours 52 Min. long.

Decreased 4 Hours 34 Min.

At the New Moon the two

Luminaries are in Sextile to

Mars their Dispositor. The

Soldiery seem to be quiet and

good-humoured for a Time.

Some elderly Men are out of

Favour, and scandaled by the

Morn. Day 10 Hours 52 Min. long

Decreased 5 Hour 39 Min.

Tongues and Pens of such

as know no Bounds to their

Malice. This Autumnal Quar-

ter is like to prove sickly. It

is probable a Testimonial or

Memorial of Honour is con-

ferred on some eminent and

worthy Person; or it's very

like a new Judge, or Muta-

tion in Judges.

Day 10 Hours 7 Min. long

Decreased 6 Hours 22 Min

The 22d Day of this Month

1727, his Majesty was crown'd

King of Great Britain, &c

whom God preserve long to

live, for the Safety of his

Kingdoms, and from Popery

November hath XXX Days.

If Will be free, and hath a Power to stand
Against all Lusts and Passions of the Man,
This clears the Point, and makes your Freedom plain,
'Tis in your Power to act, or to refrain:
If this were true, we doubtless could do more
Than Father *Adam* could or did before.

December hath XXXI Days

This Providence, Free-will, and mystic Fate,
Are God's unfathom'd Mysteries of State :
They dwell above in Harmony alone,
And move by certain Springs to us unknown ;
We give them names, hard words with nonsense fill'd,
Which please us, as your Rattles do a Child.

Of the ECLIPSES this Year, 1761.

WITHIN the Revolution of this Year there will be Six Eclipses, *viz.* Four of the Sun, and Two of the Moon, only one of the Moon will be visible in our Hemisphere; the other five will be invisible, and they will happen in the manner following,

The First Eclipse is an invisible one of the Sun, which will happen on the fourth Day of *May*, at 7 o'clock in the Morning, and it falls in the 14th Degree of the Sign *Taurus*.

The Second is a visible Eclipse of the Moon, on *Monday* the 18th Day of *May*, at 10 o'clock at Night, and falls in the 28th Degree of the Sign *Scorpio*, a watery Triplicity; it happens to fall in the Third Decanate of *Scorpio*, the same is threatened with sharp Sickneses, with many Seditions, Quarrels, and Slaughters, especially those countries subject to that Sign.

The Third Eclipse is an invisible one of the Sun, which will happen on the 3d of *June*, at 1 in the Morning, in the 12th Degree of *Gemini*; it falls in the second face of that sign, signifies Piracies, Murther, and Theft.

The Fourth Eclipse is of the Sun, invisible, on *Tuesday* the 27th Day of *October*, near 11 o'clock at Night, it is celebrated in the 4th Degree of the Sign *Scorpio*.

The Fifth is an invisible Eclipse of the lesser Luminary the Moon, which happens on *Thursday* the 12th Day of *November*, at Noon; this falls in the 20th Degree of the Sign *Taurus*, an earthly Triplicity.

The Sixth and last Eclipse is of the great Luminary the Sun, invisible in our Horizon, upon the 26th Day of *November*, about 3 in the Afternoon, celebrated in the 5th Degree of the Fire Triplicity, call'd *Sagittarius*.

The

The Author's Judgment on the Four Quarters
of the Year 1761; drawn from the Motion
of the Heavenly Bodies.

I Having said something over the Months in this Year, as well as some time past, relating to Fate, Free-will, &c. I do not think it amiss here to give the Opinions of two great Men about that Matter, and how they understood it; because the word Fate is now grown a Bugbear among weak People, and all those whose Employments send them another Way. To say there is no such Thing as Fate, is as false as to lodge a Necessity in it; for he that runs all into a fatal Necessity, destroys that which Mankind are so mighty fond of; that is, a free Agency. The truth is, Mankind are too apt to drive Things into Extremes, and so according to their Opinions, let their Errors grow monstrously great; and as one spreads to the Left, the other extends the other Way: and like two Lines intersecting each other, the longer they are drawn the further apart. Thus *Possidonius* tells us, "That Fate is an Immutability in the order of all Things, with a continual Necessity in Nature." And this he attributes to the Constellations of Heaven. On the other hand, *Chrysostom*, in his 44th Hom. on the Gospel of *John*, says, *si Resurrectio est & Judicium, non est Fatum*: "That if there is a Resurrection and Judgment, there can be no Fate." A pretty odd sort of an Argument, which may sway with some Men, but not with me. And in another of his Homilies he says, *Miser est, qui se Fati subjecit Vanitati*: "That he is a miserable Soul that subjects himself to the Vanity of Fate." I take this to be a very silly Expression; for if there is such a Thing as Fate, it doth not lie in Man's Choice to subject himself, &c. If there is no Fate, how can Man subject himself to nothing, or to that which is not? Thus you see how these Extremes are used, when perhaps neither of them knew any thing of the Matter. But to come to what I promised above: *Firmicus* tells us, "That Fate is a Connection of Causes which doth receive its Power and Force from the Motion of the Stars; and by that

“ that Motion also it is perfected and produced.” The second, which is *Justus Lipsius*, says, “ I call that a Mathematical Fate, that joins and knits all Events and Actions to the Power and Positions of the Stars; of which the *Chaldeans* and *Astrologers* were the first Authors. But among the *Philosophers*, the first Author was the most excellent *Mercurius* in his Epistle to *Ammon*; where subtilly, and with good Reason, distinguishing between Providence, Necessity, and Fate, he says, That Providence is the absolute Divine Power of God, to which there are two other Faculties related, *i. e.* Necessity and Fate: And this Fate attends and serves Providence as well as Necessity. But the Stars are subservient to this Fate only: For no Man can escape the Force of Fate, nor secure himself from the Power of the Stars. These are indeed the Weapons and Arms of Fate, by whose Decree all Things both in Men and Nature are effected and brought to pass.”

According to the Opinion of *Lipsius*, you see Fate is nothing else but the Power and Providence of God by another Name; and therefore when we fall rigidly upon Fate, the stroke seems to aim at something else, because it is but a Derivative, and receives its Force from the Original, from whence all the visible and invisible Varieties in the World do naturally and freely flow. If so, it is not a rash Matter where we lodge the Cause of the annual Products of Nature, the Hurries and Confusions of the World and human Contingencies, whether in the Stars, in Fate, Necessity, or Providence; seeing the Power of God is the Soul of the World, and nothing moves till his Finger gives the Touch. And they that talk or understand the Soul of the World, exclusively from this providential Power, I doubt they are deceived. But let this suffice for this Time. I come now to examine and consider of the Brumal or Winter-Quarter first.

Upon

Upon the FOUR QUARTERS of the YEAR; and
first, of the WINTER-QUARTER.

WHICH takes its Beginning this Year on *Sunday* the 21st Day of *December*, at 15 Minutes past 7 in the Morning, at that Time there will be 20 Degrees of 69. on the *Medium-cæli*, and 17 Degrees of *Sagittary* is on the oriental Angle, or the Ascendant. The Moon is in 15 Degrees of *Gemini* near Cusp of the 7th House departing from the Trine of *Venus*, and applying to the Opposition of *Mercury*, and to the Square of *Saturn*, and Trine of *Jupiter*; all the Planets are under the Earth. The grand Meetings and Councils of great Men in divers Countries, annoyed or troubled with Divisions and Discords, and Matter of great Importance, delayed to the Damage of the public Interest; and thus stands the Face of the Heavens at the Time of this Ingress. It was the usual Method of the antient Practitioners and Authors in this Art to judge of the Year by the Lord of the Year, as they call it: The Method how to elect that Lord you will find in *Origanus*, Part 1. Page 471. and forward. They did also much depend on the *Almuten*, or Lord of the Nativity, and to as little Purpose. As to that of Nativities, I am certain it is an idle Thing to say this or that Planet is the *Almuten*, or Lord of the Nativity, for they are all equally Lords in their Places; and to say this or that essential Dignity gives them that Power, is next to Nonsense. I believe some of the eastern Vassals, that were Slaves to their tyrannical Monarchs, were the first Inventors of that Doctrine. For the Government of Heaven is a Commonwealth of Seven, and no one Lord among them, but they are all equal. Nay, the Sun, (that some People have brought to prove Monarchy by) is but a Duke of *Venice* at best. But to return to the Lord of the Year again. As I have done, so I will again lay it aside, and judge by a more rational Way in my Judgment.

Tempestuous Winter's now blown o'er,
And breezing Zephyrs fan the Shore:
A vernal Green adorns the Field,
And herbs their fragrant Blossom yield:

The

G A D B U R Y's Observations, 1761.

The Trees with fertile Buds appear,
And all presage the thriving Year;
Our Fleets and Armies now prepare,
To usher on a prosperous War.

Of the S P R I N G - Q U A R T E R.

BEGINS this Year on *Friday* the 20th Day of *March*,
at 9 o'clock in the Morning; at that Time the Hea-
vens appears as follows:

In the last Quarter the Planets were under the Earth, but at this Ingress are all above the Earth in the eleventh House, only ♀ and the Moon, she is in the 5th House, lately separating from the Opposition of *Jupiter*, and Trine of *Venus*, and applying to the Opposition of the ☉, ♀, ♂, and ♄. Thus stand the Configurations at this Spring Quarter. At the latter end of the last Quarter there was a Conjunction of *Saturn* and *Mars* in *Aries*; and
Mercury

Mercury in Conjunction with them, both in the same Sign, ll three of them fall among violent fixed Stars of the Nature ♂ and ♀, which will add much of the Nature of those Stars, to the Force and Quality of the Effects they are likely in all Probability to produce, in those Parts where they will spend their Power and Fury. And to be better understood, I will a little enlarge on this Subject, and in order to this Matter, I will lay this Sentence down as an Axiom: That all the Conjunctions of *Saturn* and *Mars* are of a malefick Tendency, and inimical to human Nature; but some more than others, from the Violence of the Parts of Heaven in which they are celebrated. And this, if need be, proved by Experience and Examples in a plentiful Manner, with a little Retrospection. In my Judgment on these Conjunctions, I shall not trouble you with that pedantick Way of quoting Texts from a great many Authors, though I have them before me, but give you my Thoughts in as short and concise a Method as my Judgment, and the little Room I have, will admit and direct me. These two Maleficks are both direct and swift in Motion, and for that Reason they will hasten, and by their endeavour add to its Expedition and Fury, whose Effects do naturally tend to Hostility and Violence by Blood and Force of Arms, that it will shew its Power in, so I judge this Quarter will be spent in much Projects and Contrivances that shall seem most probable to induce and facilitate the Designs in Hand, but the Execution of it will be delay'd till they come to the Square of each other, and then you may expect the Motion of Men and Arms, and Action, to attend it. Things seem at present to be carried on as if Friendship and Agreement were intended, yet for all those Pretences there is Tricking and many fraudulent Designs intended, and under the Influence of this Quadrate former Leagues and Contracts, Articles and Agreements, will be questioned and called into Controversy. The Truth is, there can be no Good expected from these Things to Mankind, because ♄ and ♂ are naturally Enemies both to our Being and Well-being. *Saturn* shews lingering Diseases, Scarcity of Food and Subsistence. *Mars* signifies Contentions, Wars, Breach of Leagues, Destruction of Mankind.

Of

Of the SUMMER-QUARTER.

THE Summer-Quarter begins when the Sun enters *Cancer*, which is on *Sunday* the 21st Day of *June*, at 56 Minutes past 7 in the Morning, at which Time 15 Degrees of *Leo* ascend the Horizon, and 29 Degrees of *Aries* is on *Medium-cæli*; at this Ingress we find ♀ and ♃ in the Eleventh, in Sextile to the Moon in 7th, in * to ♀ and ♂ in the 11th, but ☉ going to the Conjunction of ♄ in □ to *Saturn* and *Jupiter* from cardinal Signs, will raise hot-headed People, and such as are Enemies to Union, Peace, and Happiness: Men that have no Principles of Virtue are easily biassed and swayed by Interest, even to the betraying of themselves and Posterity, and abusing a good and righteous Cause, ♀ cannot pass out of *Pisces* into *Aries*, but with Uneasiness to that Kingdom from those People, and generally where he passeth *Virgo* and *Libra* he doth the like.

The Autumnal or Harvest Quarter.

WHICH this Year begins on *Tuesday*, the 22d Day of *September*, at 30 Minutes after 9 o'Clock at Night, the Sun enters Sign *Libra*, at which Time there is 26 Degrees of *Gemini* in the Ascendant; and 20 Degrees *Aquarius* in the *Medium-cæli*, or tenth House. The Moon in the Sign of the second House in her own Dignities, going from the Square of *Saturn*, and applying to the Sextile of *Mercury* and Trine of *Jupiter*. *Mercury* in *Virgo*, in opposition to *Jupiter* in *Pisces*, both strong, *Venus* in Conjunction with *Mars* on the Cusp of the 4th House. Thus stands the Positions of the Heavens at this Ingress. This Scheme has some Resemblance of the Spring; and most of the Planets are dignified, in benevolent Aspects, which shews that Men and Things seem to tend to Peace and Quietness with Profit to the common People, which is represented by the Moon being well placed in the Scheme.
